Warehouse Management System

Next View Software provides a flexible and powerful Warehouse Management System designed to optimize inventory, space and workload across your supply chain. Complete visibility of raw materials, work in process and finished goods across manufacturing, distribution, retail and 3PL facilities can be achieved with our software solution.

Based on more than 20 years of successful project experience around the globe, Next View's team has created a feature and function rich WMS solution. Put our experience and the experience of our partners to work for you.

Next View's Warehouse Management solution is workflow based and can be easily configured to fit with your operations. Next View Focus WMS is a warehouse management system based on the Microsoft .NET 2.0 architecture. Focus WMS utilizes a service oriented architecture with web services and work flows that can be easily tailored to fit the requirements of your operations.

Complete Warehouse Management Solution

- Complete inventory, space and work force management
- Support for manufacturing & value-added services
- Multi-site capability
- Yard, dock scheduling and management
- Material handling system integration
- Activity-based costing
- 3PL storage & billing
- Drill-down dashboard & KPIs
- Configurable work processes
- Powerful search, query and reporting

Cloud powered by Windows Azure

- High reliability and security
- Minimize IT costs
- Support smartphones and tablets
- Hassle-free upgrades
- Web based interface

Benefits

- Total inventory & workload visibility
- Optimize material flows
- Workflow-based processes
- Improved trading partner collaboration
- Reduce on-hand inventory
- Improve inventory cycle times
- Complete audit capabilities
